

## **IICT MEMBERSHIP & OAMPS INSURANCE FOR TRE:**

OAMPS Insurance Brokers ([www.oamps.com.au](http://www.oamps.com.au)) have approved TRE as a modality for public liability and professional indemnity insurance, (both for certified TRE practitioners as well as trainees) however require therapists or trainees to be a member of a professional association.

If you are not already a member of a professional association, TRE is now an approved modality by the International Institute of Complimentary Therapies ([www.iict.com.au](http://www.iict.com.au)) with a range of membership options available from full through to student membership and an existing code of ethics (<http://www.iict.com.au/constitution.htm#code> )

### **INSURANCE OPTIONS:**

*If you are already insured by OAMPS for another modality:*

- You can have TRE added as an extension to your existing policy

*If you are insured by someone other than OAMPS for another modality:*

- You can apply to your current insurer to have your existing policy extended to include TRE
- You can transfer your policy to OAMPS to include your existing modality and TRE
- You can maintain your current policy and apply for a separate policy with OAMPS for TRE

*If you do not currently have professional insurance:*

- Become a member of the IICT under the TRE modality
- Apply to OAMPS for insurance for TRE using your IICT membership

*Student Insurance:*

- If you have an existing policy with OAMPS for another modality you can have your policy extended to cover your TRE training
- If you don't have existing policy with OAMPS you can take out specific TRE student insurance as long as you are a member of an existing association (this option is more expensive as you are not yet certified)

NOTE: it is the responsibility of the individual trainee or certified TRE practitioner to ensure you have adequate and appropriate professional indemnity and public liability insurance.

NOTE: OAMPS insurance requires a health form /exercise consent to be completed for each client – see p 21 of policy wording
